

Print from your iOS Device (iPhone/iPad)

You can print from your phone or tablet as long as you are connected to the AU wireless network (AU_WiFi).

1. Install the PaperCut printing app

1. Go to <http://tigerprint.auburn.edu:9191/ios/install>
2. Press "Install", and then press "Install Now".
3. If your device has a passcode, you may be asked to enter it.
4. If you get a message stating "Profile not signed" press "install."
5. Select Done.

2. Sign in and print

1. Go to your apps and select the PaperCut printing app.
2. Sign in with your Auburn username and password. Your printing balance and recent print jobs will be displayed.
3. Now that the app is running and you are signed in, you can print from other apps that support printing (Ex. going to your photos and selecting print).

Note: The PaperCut printing app **MUST BE RUNNING** before you can print (you should only have to sign in once).

4. Select print for the job you want to print.
5. Select AUMR for the printer from your list of available air printers.
6. When you select AUMR, it will install the printer.
7. Print your document.
8. Your print job is now sitting in the AUMR print queue. To learn how to release the print job to a specific printer on-campus, see "Releasing a print job from the AUMR print queue" (section below).
