Subject: School of Aviation Safety Policy

To All Faculty, Staff, and Students:

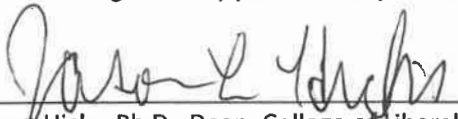

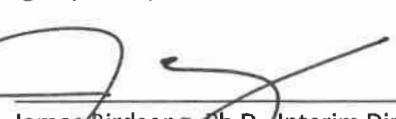

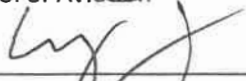

We are committed to maintaining a robust Safety Management System (SMS) that ensures the well-being of our students, faculty, staff, and the public.

Our commitment to safety:

1. **Safety Goal:** Zero accidents or incidents resulting in fatalities or serious injuries.
2. **Safety Culture:** Foster a proactive safety culture where safety is a core value. Every community member is encouraged to report safety concerns without fear of reprisal.
3. **Risk Management:** Systematically identify, assess, and mitigate risks associated with our aviation activities, aiming to minimize hazards and manage risks to an acceptable level.
4. **Safety Assurance:** Continuously monitor and evaluate our safety performance. This includes regular audits, inspections, and reviews to identify areas for improvement.
5. **Safety Promotion:** Promote safety awareness and education. This includes ongoing training, safety briefings, and information dissemination to all community members.
6. **Emergency Response Planning:** Maintain and regularly exercise an emergency response plan to ensure a smooth transition from normal to emergency operations.
7. **Continuous Improvement:** Commit to constant improvement. We will regularly review and update our safety policies and procedures to reflect best practices and address emerging safety challenges.

Roles and responsibilities:

- **Leadership:** Our leadership team is committed to providing the necessary resources and support to implement and maintain our SMS and set the tone for safety and meeting safety objectives.
- **Staff and Faculty:** Staff and Faculty are expected to lead by example, integrate safety into daily activities, and foster a safe learning environment.
- **Students:** Students are expected to take an active role in their own and others' safety by promptly adhering to safety policies and procedures and reporting any safety concerns.

Jason Hicks, Ph.D., Dean, College of Liberal Arts,
Accountable Executive
David Bottomlee, Ph.D., Director of Flight
